Positive Parent Investment Rubric

What does it look like on a scale → The factors/tenets ↓	1	2	3	4
	<i>No awareness and no preparedness</i>	<i>Aware and prepared</i>	<i>Thought-oriented</i>	<i>Action-oriented</i>
Communication	1. I don't know how to talk to my child about their day and share my experiences with my child. 2. I don't think it is important to have these conversations.	1. I know it is important to talk to my child about their day everyday. 2. I am willing to learn how to do it.	1. I sometimes ask my child about their day and share my experiences. 2. I know how to talk about these things with my child. 3. I feel prepared to address any problems.	1. I ask my child everyday how their day went, and also share about my day. 2. I am able to address any problems that might come up in these conversations.
Financial Planning	1. I do not have a plan for the present and future financial needs of my child, and I do not think it is important to have one.	1. I know it is important to have a plan for the present and future financial needs of my child, and I am willing to learn how to create one.	1. I know how to create a plan for the present and future financial needs of my child.	1. I have a plan for the present and future financial needs of my child.
Physical health and nutrition	1. I don't think it is important to take care of my child's diet and exercise. 2. I don't know how to take care of my child's diet and exercise.	1. I know it is important to take care of my child's diet and exercise. 2. I am willing to learn how to do it.	1. I know how to take care of my child's diet and exercise. 2. I sometimes take care of my child's diet and exercise. 3. I feel prepared to handle any medical emergencies that may arise.	1. I take care of my child's diet and exercise everyday. 2. I am able to handle any medical emergencies successfully. 3. Preventative care
Investment in academics	1. I think that my child's performance in school does not affect my child's future. 2a. I have very little time to talk to my child about their learning in school. 2b. I am unsure of what homework my child gets everyday. 3a. I feel that I am not useful in my child's study. 3b. My child rarely studies at home.	1. I think that my child's performance in school can affect my child's future. 2a. I sometimes have time to talk to my child about their learning in school. 2b. I know very little about my child's homework completion. 3a. I am willing to learn how to help my child do better in school. 3b. My child only studies when I sit with them.	1. I think that my child's performance in school definitely affects my child's future. 2a. I ask my child about their learning in school everyday. 2b. I sometimes check if my child is finishing their homework. 3a. I know how I can help my child study and I sometimes help them. 3b. I know some resources that might help my child learn better on their own.	1. I think that my child's performance in school is very important for my child's future. 2a. I communicate with the teacher about my child's learning when I need to. 2b. I make sure my child's homework is completed regularly. 3a. I know how I can help my child study and I regularly help them. 3b. I encourage my child to use different resources to learn on their own.
Investment in social-emotional wellbeing	1. I don't think it is important for a child to be able to express their thoughts and emotions. 2. I do not know about my child's relationships outside of the home, and about their emotion-management 3. I don't think my child needs hobbies.	I know it is important for my child to express their thoughts and emotions freely. 2. I know about my child's social relationships and emotion-management 3. I am willing to learn how to help my child do better in managing their relationships and emotions 4. I know it is important for my child to have hobbies and activities.	1. I sometimes ask my child to express their thoughts and emotions. 2. I know of some ways in which my child manage their emotions. 3. I know of some ways in which my child can interact with others positively. 4. I sometimes let my child explore hobbies and activities.	1. I encourage my child to express their thoughts and emotions freely. 2. I teach my child how to manage their emotions on a daily basis. 3. I teach my child how to interact with others positively everyday. 4. I encourage my child to engage in hobbies and activities daily.

Student Engagement Rubric

What does it look like on a scale → The factors/tenets ↓	1	2	3	4
Collaboration	1. I don't know how to work in groups 2. I think sometimes my group does not understand me, or I don't understand my group. 3. I do not know how to help others around me if they need it 4. I do not know how to ask for help from the people around me if I need it	1. I understand why teamwork is important. 2. Sometimes, it is hard for me to work in teams. 3. I understand how helping others when they need can help me learn better. 4. I understand that I should ask for help when I need it.	1. I think that each person and their idea is as important as mine. 2. I understand that sometimes what I have planned may change 3. I sometimes help others when they need it. 4. I sometimes ask for help when I need it	1. I can unite/gather people with different ideas towards a common goal/idea 2. I regularly help others when in need. 3. I regularly ask for help when I need it. 4. I understand that I cannot grow alone, and that we all can grow best together
Communication	1. I don't know how to share my ideas and thoughts 2. I don't think I need to hear other people's ideas	1. I like to hear what other people have to say because I think other people's ideas are as important as mine 2. I know what I want to say, but sometimes it is hard to explain. 3. I believe we learn by sharing our thoughts and ideas	1. I listen to other people before I speak. 2. I listen to understand 3. I think about what I hear from other people in detail. 4. I can speak very clearly and logically. 5. I can write very clearly and logically.	1. I actively support the things that I believe in. 2. I actively speak against the things that I think are unfair.
Creativity (& curiosity)	1. I don't think learning new things is useful 2. I do not know how learning new things will help me.	1. I like learning about different things 2. I don't like change	1. I like thinking about new ways to do things 2. I accept change	1. I think about solutions and ideas, rather than only problems 2. I believe that my ideas can bring change
Critical thinking	1. I don't think about my actions and their consequences 2. I don't think about other people's actions and their consequences 3. I don't know how to ask questions about the things around me	1. I sometimes spend time trying to understand and question my actions and ideas 2. I sometimes spend time trying to understand and question other people's actions and ideas	1. I try to learn more about how my experiences shape the way I see the world. 2. I try to learn more about how others' experiences shape the way they see the world	1. I am aware of how my experiences shape the way I see things 3. I can change how I see things when I find a better way
Consciousness	1. I don't know what makes me happy or sad. 2. I don't know what my grows and glows are. 3. I don't know what my goals are.	1. I know what makes me happy and sad. 2. I think that knowing my grows and glows is important. 3. I want to set good goals for myself.	1. I try to do things that make me happy. 2. I know my grows and glows. 3. I try to set good goals for myself and try to achieve them.	1. I do things that makes me happy, and also try to find more 2. I keep working on my grows and increasing my glows. 3. I set good goals for myself and create action plans to try to achieve them.

Investment in Academics

This will consist of in-person/virtual interaction with parents at regular intervals to facilitate a conversation around their experience and ideas about education. It would be most impactful as a collective space, but one-on-one communication with the parents is also an option. The flow is as follows:

Start here

Engage

What do you remember about your learning experience as a child?

Explore

How much did your education help you?

Elaborate

How do you picture your children as grown-ups? What are they saying, doing, believing

Elaborate

What are your children's possible careers like?

Elaborate

How is their relationship with you? What are some expectations you have of your children?

Imagine

Imagine being in your child's shoes. What are some things your child would need to do or believe to get to a place of success?

Feel

Click on [this link](#) to listen to some responses from the previous questions

Elaborate

What is success for you?
How important is it? Why?
How will it help your child?

Elaborate

Based on this, what is your idea of your kid's education?

Think

Think of one thing you feel that you should talk to your child about every day?

Do

Practice talking to your child about this for the next 5 days

Share

Share your observations and feelings about it in a voice note

Feel

Click on [this link](#) to listen to some things that were shared during the last session

Share

Send your responses as a voice note.

Do

Record/write something to explain your answers from the "Think" section.

Think

What actions can get your child closer to this perfect academic success? What can you do?
What can your kids do?

Imagine

If the child's academic success was in your hands, how do you imagine it would be like?

Financial Planning

This will consist of a series of 4 in-person sessions conducted in association with financial planning professionals. A working framework for the flow of these sessions is as follows:

Purpose setting and reality check

1. Get a temp check on what they think financial planning is
2. Case study about someone who needs money for education.
3. Discussion about the different ways of dealing with this situation and different solutions.
 - a. Emphasis on the benefits of planning in advance.
4. What is financial planning and why is it important?

Introduction to saving options and financial planning

1. Different methods of financial saving.
2. Policies/scholarships

Current behaviour and goal setting (dealing with 8, 12, and beyond)

1. What are needs and wants, and how they are different from each other.
2. Self assessment around current reality of financial preparedness for children's education.
3. Self assessment around students' educational goals and resources to calculate approximate expenditure.
4. Discussion around possible ways to go about planning to meet the needs.

Weekly-Monthly tracking of behaviour

1. Set up a system for financial saving.
2. Mutually agreed upon tracking tools used to check on parents and encourage continued involvement with financial planning tools.
3. Slowly waning off of tracking as this becomes a habit.

Physical Health and Nutrition

This will consist of in-person/virtual interaction with parents at regular intervals to facilitate a conversation around their child's health and nutrition. It would be most impactful as a series of 3 spaces, but one-on-one communication with the parents is also an option. The flow is as follows:

FOOD

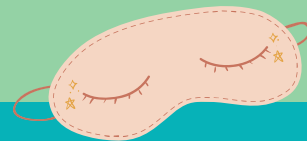

1. What are your kids eating today?
2. How do your kids' eating habits affect their health?
3. Why is eating the right type of food important for children?
4. Here is a link to [resources](#)
5. How can kids obtain the right type of nutrition?
6. Here is a link to [resources](#)
7. What do you like about your child's eating habits?
8. List 3 things you would like to change about your child's eating habits.
9. How will you get your child to change these things?

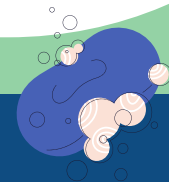

EXERCISE AND SLEEP

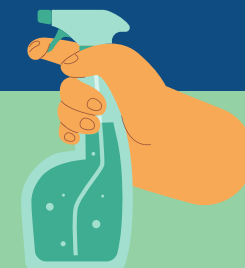

1. What did your child do to stay active today? How many hours of sleep did they get?
2. What kind of effect did these things have on your child, and why do you think so?
3. Why is it important for kids to stay active and get an appropriate amount of sleep?
4. Here is a link to [resources](#)
5. What are some ways to get kids to stay active and get a good night's sleep?
6. Here are some [resources](#)
7. List two things you'd like to focus on from the resources you just saw with your child.
8. What can we do to get the children to change these habits?

HYGIENE

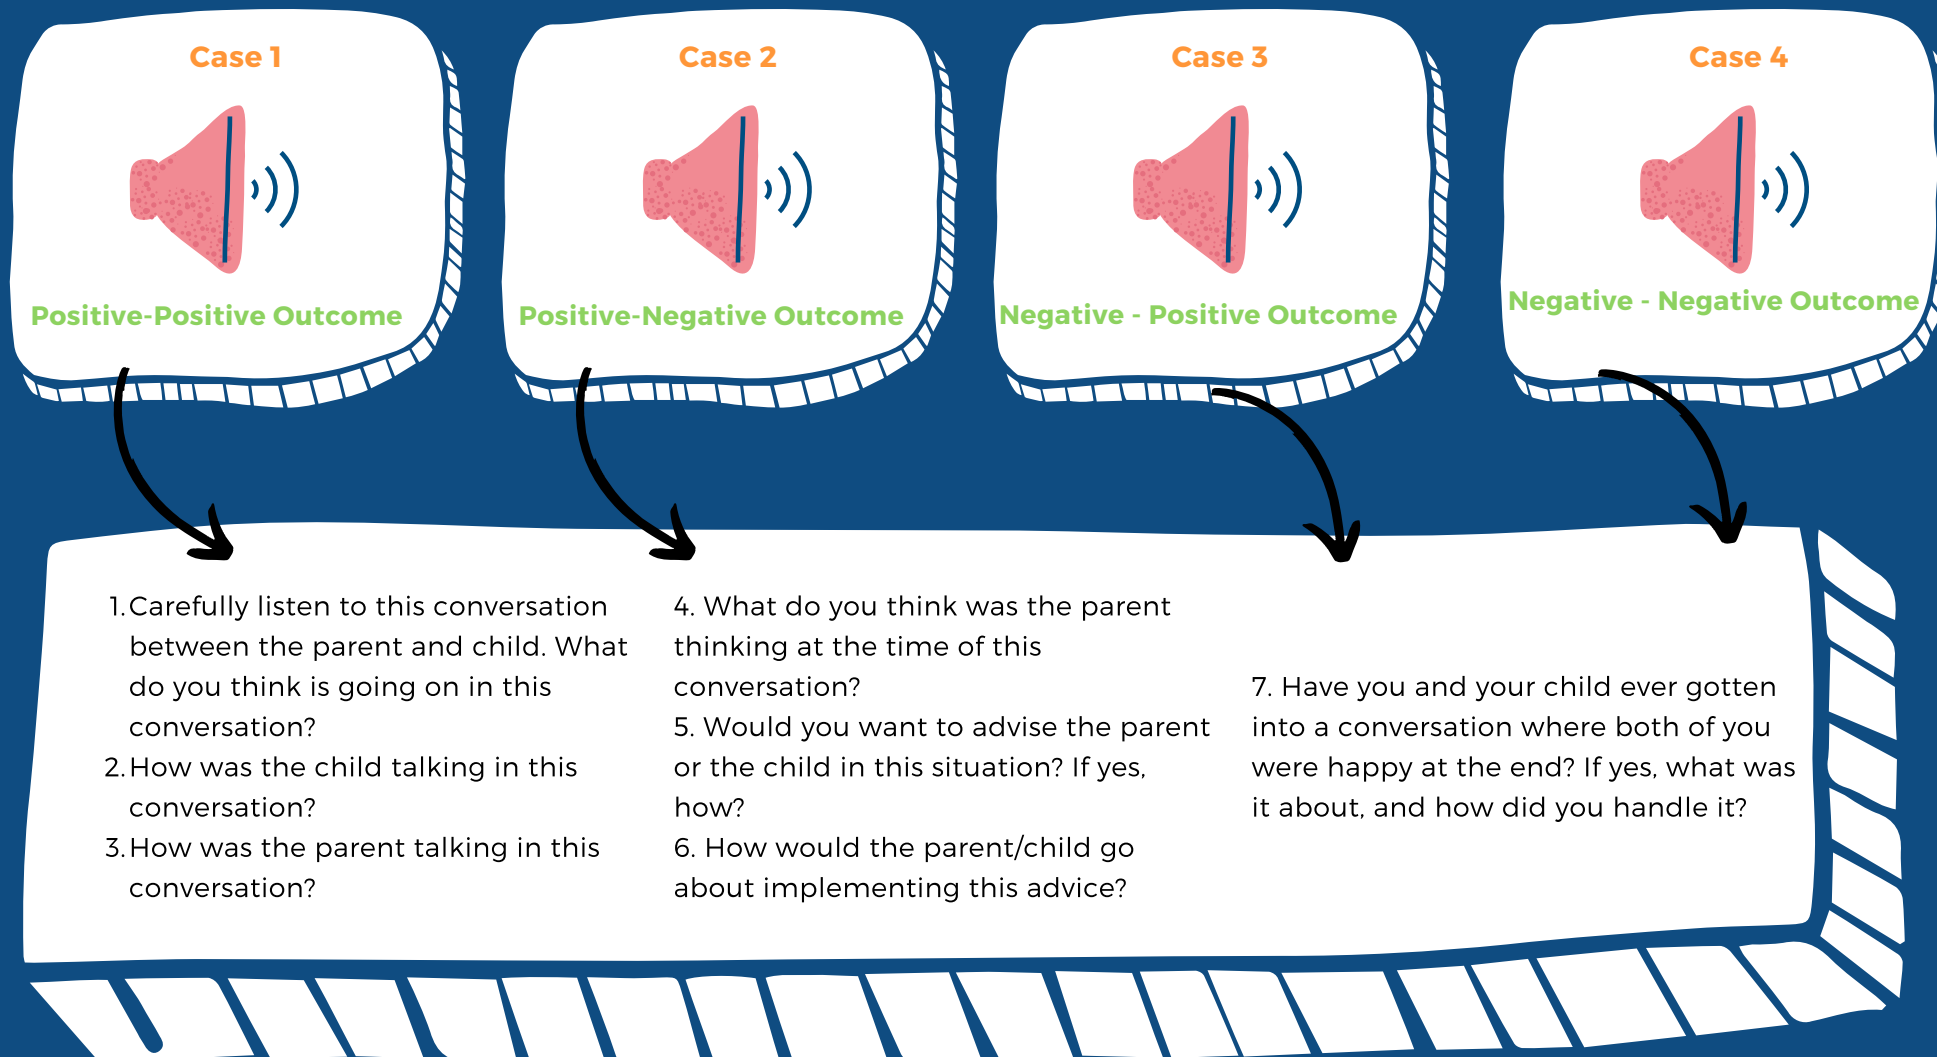

1. What does your child do to take care of his/her hygiene in times of the COVID pandemic?
2. How do these hygiene practices affect your child? Why do you think so?
3. Why do you think the right kind of hygiene practices are important for children?
4. Here are a few [resources](#)
5. If you could change two things about your child's hygiene practice, what would they be?
6. How would you go about bringing these changes into your child's life?

This will consist of in-person/virtual interaction with parents at regular intervals to facilitate a conversation around their way of communication with their children. It would be most impactful as one in-person collective space, but one-on-one communication with the parents is also an option. The flow is as follows:

Social and Emotional Well-Being

This will consist of a series of 4 in-person sessions conducted in association with Social-Emotional Learning experts. A working framework of the flow of each session and the overall module is as follows:

Purpose Setting

How do parents process and express their emotions?

- How was the last year for you?
- How did you go about processing these emotions? ([Situation Activity](#))
 - Sharing and understanding that they are not alone.

Current Reality

- What types of emotions would children need to process?
- How do parents respond to their children's emotions? ([Role Play Activity](#))
- Relate the learnings from the role-play to a separate scenario you can think of ([Letter to Yourself](#))
- How would your child feel?
- How would you address this?
- How can we as parents create spaces to process emotions for the kids?

Reflect on Implementation

- What did I learn about?
- What did I try?
- What changes did I observe?

SEL Practicum

- How to practice social and emotional learning with children as their parents?
 - Content session based on research.
 - Recommendation: Partner with SEL experts/organizations to drive this
